MIHRETEAB ERISO

SUMMARY

Software Engineer with extensive experience at Whyzzer and Interlincx, specializing in developing high-quality web applications using React and Next.js. Expertise in performance optimization and pixel-perfect design implementation. Proven ability to deliver engaging user experiences while maintaining clean, scalable code. Skilled in deploying applications on Firebase and Google Cloud.

EMPLOYMENT HISTORY

Software Engineer, 07/2024 - Current

Whyzzer - Hamburg, German, Hamburg

- Develop high-quality, responsive web applications based on Figma designs.
- Implement user interfaces using **Next.js**, **React**, **JavaScript**, and **HTML**.
- Ensure pixel-perfect accuracy in translating designs to the final product.
- Integrate frontend with RESTful APIs and other backend services.
- Optimize application performance and maintain clean, scalable code.
- Deploy and maintain applications on platforms such as **Firebase** and **Google App Engine**.

PERSONAL INFORMATION

Address: Addis Ababa AA

Phone: +251916353625

Email:

mihreteabdemeke@gmail.com

SKILLS

- Node.js
- HTML & CSS
- Git
- React
- Redux
- React Query
- Vue
- Vuex
- JavaScript
- Next.js
- Deployment(Firebase, Vercel, Google Cloud).

- Collaborate with designers, product managers, and backend developers to deliver features efficiently.

• Ruby, Ruby on Rails

Front End Engineer, 10/2021 - 06/2024
Interlincx Media

- Leveraged JavaScript to create interactive components and animations, resulting in an improved user experience.
- Pixel perfect implementation of design with Material UI, Bootstrap and CSS.
- Developed a React-based web application with a responsive user interface, increasing user engagement.
- Utilized libraries and frameworks such as React and Next.js to create interactive user interfaces.

Web Developer, 01/2021 - 10/2021
Black Nile Technologies - Addis Ababa, Ethiopia

- Implemented responsive design for cross-device accessibility.
- Collaborated with teams to meet customer needs and devise technical solutions.
- Developed secure, interactive web applications with modern frameworks and intuitive UIs.

Software Engineer, 03/2021 - 06/2021
Whizkids Workshop - Addis Ababa, Ethiopia

- Developed and maintained software in multiple programming languages, such as Java, Python, and JavaScript.
- Developed REST APIs and implemented authentication protocols, such as OAuth, to securely expose data to clients.

- Developed automated scripts to simplify common tasks and reduce manual effort.

EDUCATION

Bachelor of science, **Software Engineering**, **12/2020**

Addis Ababa University - Addis Ababa, Ethiopia

- Completed rigorous Bachelor of Software Engineering program with distinction.
- Excelled in diverse curriculum covering software development methodologies, programming languages, data structures, algorithms, and software engineering principles.
- Gained hands-on experience through projects, internships, and research, refining skills in software design, development, testing, and deployment.
- Recognized for outstanding academic performance and dedication to the field.

PROJECTS

At Whyzeer

Some projects of which I am proud to be a part are

Stereopark (music streaming web app)

- https://www.stereopark.com/
- We use Next.js to build the frontend

- We use Getstream for the streaming service

- We use branch.io for deep linking

Stereopark artist dashboard

- https://stereopark-artist-dashboard.vercel.app/en/beta-
  access

- We built a React app

- A pixel-perfect, complicated UI/UX

- Music uploading and managment dashboard

Steropark admin dashboard

- https://admin.stereopark.com/

- simple UI and beautiful dashboard

- Tailwind styling and Next.js

Koalo.app

- https://koalo.koalo.app/en

- Use Next.js for the frontend

- Design structure of white labeling

- Deployment of multiple services and white-labeled products

Koalo-web Editor

- https://koalo-web-editor-dev.web.app/studio

- A complex app designing editor

- React, Tailwind, Redux

Gamma

- https://gamma-user-web.vercel.app/en/

- A Beautiful Netflix-looking video streaming platform

- Use Cloudflare to stream video

LANGUAGES

- Amharic

- English

HOBBY

- Playing chess

- Playing football
